

NetSuite for the
Contract Furniture Industry

Customer Assets Management

Overview

Our Customer Assets Management (CAM) ensures users are able to handle the inventory management of assets owned by clients. With the accounting complexity in managing

inventory owned by customers, our SuiteApp has been designed to provide a complete 360 visibility on customer inventory.

Main Features

- Customer Assets Tracking
- Assets Transfer
- Storage and Handling Services
- Dashboard & Reporting

Track Anything & Everything

Managing customer assets could never have been easier. Our CAM SuiteApp enables NetSuite users to keep track of storage fees and handling services while keeping a tight control over the inventory processes. From item receipt to fulfillment, we provide you with a CAM solution which is 100% native of NetSuite, leveraging the core NetSuite ERP, Accounting, CRM and other key functionalities to provide a comprehensive Customer Assets Solution.

The CAM dashboard enable users to never miss any billings approval or any inventory control reminders. Hence, providing the adequate assurance for your company to keep their customer completely satisfied.

Track any activities related to management of assets within the same system ensuring all tasks, complaints, notes and communications are kept centralised.
